Pansy

Hollyhock

How to Start Seeds Indoors

Grow to Give: Support Local Food Security in Dufferin County

Would you like to make a Difference in our Community?

We're inviting community gardeners to help fight food insecurity by growing produce such as beans, okra, or hot peppers. These crops will be dried, frozen, and processed for distribution to local food banks and services that support food-insecure households in Dufferin County.

All we need you to do is plant, nurture, and harvest as many or as few plants as you'd like!

Every contribution helps support local food security.

Food insecurity is at a record high: in 2024, 25% of households in Wellington-Dufferin-Guelph (WDG) experienced food insecurity, the highest rate ever recorded.

Your contribution can help ensure that more families have access to healthy, local food.
