Bag it. Bin it. Keep Shelburne Clean!

### Curbstop Maintenance Notice

During the winter months, frost and shifting ground conditions can affect the alignment and overall condition of curb stops (water shut-off valves). As the ground thaws in the spring, your curb stop may require inspection or repair to ensure it continues to operate safely and reliably.

#### Why Repairs May Be Needed

##### Curb Box Misalignment

Winter frost heave can cause the curb box to move, resulting in:

- The curb box sitting **too high or too low**
- The curb box becoming **tilted or twisted**
- The curb box **separating from the valve** underground

When this occurs, staff may be unable to properly insert the operating key to turn the valve. Realignment is necessary to ensure the curb stop can be accessed for maintenance or in an emergency.

##### Damage from Winter Conditions

Freezing and thawing can also cause:

- Cracked curb boxes**
- Bent internal rods**
- Damage to the curb stop cap** from snowplows or shovelling

These types of damage can prevent proper operation of the water shut-off valve and must be repaired to maintain safety and functionality. If your curbstop requires repair, please contact [water@shelburne.ca](mailto:water@shelburne.ca)

**This is a Curb Stop**

### Changes to Water & Sewer Collection Policy

On February 23, Council approved updates to the Town of Shelburne's water and sewer collection policy.

What this means for you:

- The Town will **no longer issue Final Notices**. Please use your regular statements to monitor outstanding balances.
- The Town will **no longer disconnect water service due to non-payment**.
- Any account that is **over 90 days past due** will be **transferred to the property tax account twice per year**—in **June** and **December**, before new tax bills are issued.

## Get on the voters list today.

**REGISTER NOW**
